

In this year's International Contest in Mathematical Modeling, our teams of **Rachel Bennet, Sunit Khadge, and Minje Jee** and **Luz Ortiz, Julie Walsh, and Shannon Keyes** scored at the Successful Participant level—the same as 63% of the 1675 teams who competed. Our fine students scored at the same level as teams from Harvard, Columbia, Duke, Stanford, Wesleyan, West Point, University of Colorado-Boulder, and 1666 additional international teams. This year's results were most unusual in that Harvard and U. of Colorado scored at the Successful Participant level in 2009 after attaining Outstanding (Best in the World) in several previous contests.
